Department of Geography

A Report on Compulsory Field Work

On

Paschim Batabari mouza, Block- Matiali, District-Jalpaiguri

Students of Sem-5 (Hons.) and Sem-6 (General.), Session 2023-24 from 25.09.2023 to 28.09.2023

Our fieldwork and study on the physical, cultural, and socioeconomic situation of PaschimBatabarimouza, in the Matiali block of Jalpaiguri district, has examined several facets for both development and crisis. In addition, several suggestions for resolving the issues and crisis for our study's sustainable development have been given. The rural lifestyle of the residents of the Dooars region is reflected in our study area, along with their adaptation to the physical environment and related issues. The field/project report was prepared by establishing the relationship between the physical aspects and the socio-economic condition using various maps, diagrams, and statistical approaches.

Objectives of the Field Study:

1. To examine our study area's physical state.
2. To find out our study area's socioeconomic and cultural conditions.
3. To research the specifics, issues, and crisis of our field of study.
4. To emphasize some plans and recommendations for the rural development of our students' study area.
5. Creating learning experiences that work and helping our students grow personally.
6. Increasing deeper physical, social, cultural, and geographic knowledge of space of our students.

7. To strengthen our students' critical thinking abilities and experience and contextual learning.

Selection of the Study Area:

PaschimBatabari is a mouza located at the Matiali block of Jalpaiguri District. Undulating topography, Existing tea garden, tea garden workers, their life style, adaptation, animal attack like elephant and Cheetah, occasional flood situation, shiftingKurti river bed, nearby location of Gorumara National park, adds unique feature and encouraged us to select the spot as the study area.

Study Area: Paschim Batabari mouza,Matiali block, Jalpaiguri District.

Findings:

1. Enormous scope to develop ecotourism beside Kurti River and within village boundary.
2. Frequent animal men conflict makes life difficult for the villagers.
3. Crop loss due to animal intervention is quite common.
4. The villagers face medical and infrastructural issues.

Recommendation:

Modern agriculture, horticulture, and tourism require greater investment, and there should be distinct infrastructure development programs for various situations, such as education, health, drinking water, employment, etc.

Conclusion:

The general conversation regarding the socioeconomic, cultural, and physical state of our research area highlights the state of development in the absence of adequate infrastructure development. It is also seen from this perspective that many amenities are woefully insufficient. The aforementioned suggestion has been implemented by several NGOs in our government to ensure sustainable development in our study area's infrastructure.
